6281786206 | rayabarapuabhinav@gmail.com | [LinkedIn](#) | <https://github.com/Abhinav122005>

PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building web applications using Django, SQL databases, and REST-based architectures through academic projects and internships. Developed projects including a URL shortener, expense tracker, and AI-based activity description system. Interested in backend development, cloud technologies, and scalable application development.

SKILLS

- **Programming Languages:** Python, SQL, Java, C
- **Frameworks:** Django, Django Rest Framework (DRF), REST APIs
- **Frontend:** HTML5, CSS3, JavaScript
- **Databases:** MySQL, SQLite
- **Developer Tools:** Git, GitHub, Docker, Jenkins
- **Cloud:** AWS, IBM Cloud

EXPERIENCE

Python Programming Intern | VaultofCodes | [Certificate](#)

- Developed Python applications using OOP, file handling, and data structures.
- Debugged and optimized code for improved performance.
- Applied problem-solving techniques to real-world programming tasks.

AI & Cloud Intern | Edunet Foundation (IBM SkillsBuild) | [Certificate](#)

- Worked with AI and IBM Cloud technologies.
- Explored machine learning and cloud computing concepts.
- Completed hands-on projects in emerging technologies.

Web Development Intern | VaultofCodes | [Certificate](#)

- Designed and developed responsive web pages.
- Implemented front-end interfaces using HTML and CSS.
- Assisted in testing, debugging, and deployment activities.

PROJECTS

Personal Expense Tracker | Django, Python, DRF, SQLite, HTML, CSS

Live Application: <https://personal-expense-tracker-9v5a.onrender.com>

GitHub: <https://github.com/Abhinav122005/Personal-Expense-tracker.git>

- Built a secure expense management web application with OTP-based email authentication and password recovery.
- Implemented expense tracking, budgeting, analytics, category filtering, and Excel/CSV export functionality.
- Developed responsive Dark/Light mode UI with modern user experience features.
- Deployed the application on Render using Gunicorn and WhiteNoise for production readiness.
- Developed budgeting and analytics features including budget tracking, spending insights, and highest-expense category analysis.

Activity Description with Voice Output (Major Project)

Technologies: Python, Machine Learning, Computer Vision, Deep Learning, OpenCV, Text-to-Speech

GitHub: <https://github.com/Abhinav122005/ACTIVITY-DESCRIPTION-WITH-VOICE-OUTPUT>

- Developed an AI-powered system to detect and recognize human activities from visual input using computer vision techniques.
- Implemented machine learning and deep learning models for activity classification and description generation.
- Integrated Text-to-Speech (TTS) technology to convert detected activity descriptions into real-time voice output.
- Designed an end-to-end pipeline for image processing, activity recognition, and audio feedback generation.
- Enhanced accessibility by providing spoken descriptions of detected activities for visually impaired users.
- Optimized model performance through data preprocessing, feature extraction, and evaluation using standard metrics.

URL Shortener | Django, Python, SQLite

GitHub: https://github.com/Abhinav122005/URL_SHORTNER.git

- Built a URL shortening web application that generates unique short links and redirects users to original URLs.
- Developed backend logic using Django and managed URL data using SQLite.
- Implemented form validation, database operations, and URL routing.
- Designed a responsive interface using HTML and CSS.

EDUCATION:

Bachelor of Technology (B. Tech) – Computer Science and Engineering

Trinity College of Engineering and Technology

CGPA: 8.28/10, **Graduation:** 2026

CERTIFICATES:

- **Database Programming with SQL** – Oracle Academy (2024) [\[view here\]](#)

- **Machine Learning & Deep Learning** – CSI (2025) [\[view here\]](#)
- **Python for Data Science** – IBM Cognitive Class (2025) [\[view here\]](#)
- **Python Programming** – Skill India (2025) [\[view here\]](#)
- **Frontend Development (HTML5, CSS3)** – TASK (2024) [\[view here\]](#)

ADDITIONAL INFORMATION:

- **Languages:** English, Telugu
- **Interests:** Python Django Developer, Full Stack Developer, DevOps, AIML, Cloud
